

Inspection Report

Permit Holder: Pacific Canbriam Energy Limited
Inspection: 2026-1553
Inspection Date: 2026-05-13
Inspection Outcome: Non-Compliance(s) Found

Inspection Comment:

I met the Pacific Canbriam Operator and Roamer on location for a joint inspection. Thanks to them for our conversations, information sharing and interest in knowing what items a BCER inspection covers. I also appreciated seeing their corporate inspection form and their overall self compliance monitoring.

Observations;

2 sets of stairs are leaning into the well heads and these have already been identified to be corrected shortly.

One chemical tank load box cap was missing but found and installed.

There is some ground subsidence around the pipeline riser but these have wooden lathe close to them and easy to see. They will be addressed shortly.

All meter runs and meters are current in their calibrations and service.

Pipeline insulation kit appears to be in good shape. There is a CORRPRO deficiency tag that will need to be addressed if not already done.

Just one deficiency for this site but everything else is being maintained, well documented, operators are making their site visits and no main concerns.

An Inspection was conducted and as a result Non-Compliance(s) were found and must be corrected. For specifics on the Non-Compliances, refer to the **Non-Compliance Notice**.

To respond to these Non-Compliances, access the CM-IS Permit Holder Application.

Consideration should be given to checking your other locations for similar Non-Compliances.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.

Permit: 100079681
Well ID: 29799
