

## Inspection Report

Permit Holder: Canadian Natural Resources Limited

Inspection: 2026-1927

Inspection Date: 2026-06-04

Inspection Outcome: Inspected

### Inspection Comment:

When I arrived on site the CNRL Operator was there plus a work crew replacing one of the green Fisher chokes. Thanks to the operator for our discussions.

While there is only one active well on location, there are 3 other cellars and mouse holes that are well covered with steel welded plates. One chemical tank is not in use while the other with corrosion inhibitor is in use and complaint with its set up. The containment bin at the pipeline riser is bonded and grounded with the pressure alert valve and chain length complaint. The meter runs are all current for service/calibration.

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.

Permit: 100082724

Well ID: 31109

Well Name: CNRL HZ GRAHAM B- 051-E/094-B-08
