

Inspection Report

Permit Holder: NTE Energy Canada Ltd.
Inspection: 2026-1955
Inspection Date: 2026-06-09
Inspection Outcome: Inspected

Inspection Comment:

WA# 13195 - June 9, 2026, 9:32 hrs. on site.

Wellhead: SCV valve open, LEL gas measured (Altair-5x), flow observed.

KERMIT most recent gas production date: 2026-04 (Active Status).

Signage posted is compliant to standards.

Well Cabinet: orifice plate service date: 2024. Cata-dyne regulator vent line (1x) in place/installed.

Storage: double wall tanks (2x), metal containment with drain plug installed, SDS labels present, and grounded

Flowlines: flowline is connected from wellhead to the well cabinet; flowline is also connected at the pipeline (Active Status). Flowline: snake wrap and insulation is hanging/detaching from flowlines; this potentially requires maintenance in the future. Geotextile material/fabric is stored on site (south side of road entrance).

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.
