

Inspection Report

Permit Holder: PETRONAS Energy Canada Ltd.
Inspection: 2026-2004
Inspection Date: 2026-06-11
Inspection Outcome: Non-Compliance(s) Found

Inspection Comment:

I stopped in at the Petronas compressor station to let the operator know I was conducting inspections in the area.

Observations;

The chemical tanks were not in use on the day of inspection. The orange plastic snow fence for the G well cellar needs to be refreshed. The fencing has pulled away from the zip ties and is badly UV damaged. The sand filter skid for the c-b-J well could use a gravel/dirt ramp or a set of stairs as it is a bit of a stretch to get on and off the landing. One of the outward facing sand filter skid has a gravel ramp to help solve the same issue.

An Inspection was conducted and as a result Non-Compliance(s) were found and must be corrected. For specifics on the Non-Compliances, refer to the **Non-Compliance Notice**.

To respond to these Non-Compliances, access the CM-IS Permit Holder Application.

Consideration should be given to checking your other locations for similar Non-Compliances.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.
