

Inspection Report

Permit Holder: LNG Canada Development Inc.

Inspection: 2026-2120

Inspection Date: 2026-06-08

Inspection Outcome: Inspected

Inspection Comment:

Inspection of Kitimat River Side Channel (KRSC) culvert debris removal scope on June 8, 2026.

- * Accumulated woody debris was removed from both culvert 1 and 3 to enhance flow into the KRSC prior to arrival on site.
- * Cleanup of woody debris left on berm was underway at time of inspection.
- * Excavator performing work was equipped with biodegradable hydraulic oil.
- * Environmental monitor was present on site for the duration of scope. Bird nest survey was completed prior to commencement of work and water quality samples were taken throughout debris removal process at each culvert. No environmental issues were identified by the environmental monitor.
- * Spill kits and booms were staged appropriately adjacent to work area and easily accessible if needed.
- * Work area clean and organized with no visible waste.
- * Following a review of the permit application and associated documentation, it was determined that the debris removal activities undertaken at Culvert 1 were not authorized under AD #100122577. The matter has been referred to Enforcement, and any subsequent correspondence will be issued accordingly.

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.
