

Inspection Report

Permit Holder: FortisBC Energy Inc.

Inspection: 2026-2968

Inspection Date: 2026-08-16

Inspection Outcome: Inspected

Inspection Comment:

Inspection with the operator of the Cheery Creek pipe replacement and instream work, AD 100121833, CIAS 0010525 Old pipe has been removed, and the replacement pipe is buried with the exception of the slope portion of the excavation where the pipe is still daylighted in the open trench. The new pipe has been welded in place. The bypass is still active and will remain in place until an adequate depth of cover is in place over the entire pipe line. The open cut instream work has been backfilled with approximately 2.5 meters of cover.

The isolation dams have been removed, and the channel is dry. Armoring of the banks of the open cut are still ongoing with 250kg stone and lesser, Root wads are installed and spawning suitable gravel has been placed into the channel. A thalweg is present and large stone has been placed in channel for velocity breakers and fish habitat. The operator will be mechanically processing Sage to replant along the sloped portion of the work zone to promote quick vegetation growth for sediment and erosion control in that area.

The upstream portion of the stream has had armor placed along both sides to a height of approximately 2 meters. Root wads have been placed in the armor and large stones placed in the channel. thalweg is present.

Final reclamation of the instream work is expected to be completed by the end of September 2026. The operator states they are in discussions with the land owner to plan reclamation and seeding of the privately owned land.

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.
