

Inspection Report

Permit Holder: Clarke Lake Geothermal GP Ltd.
Inspection: 2026-3331
Inspection Date: 2026-09-17
Inspection Outcome: Non-Compliance(s) Found

Inspection Comment:

C-87-I and c-A87-I inspected.

These are wellheads only. No surface equipment.

Both wells chained and locked. See Comment below.

Signs and surface casing vents compliant.

Wood mats., plastic totes and steel casing stored on location.; no concern.

Comments:

1. At c-87-I, the wellhead master valves are sufficiently chained and locked. However upper and lower wing valves are not chained and locked. The requirement in the Drilling and Production Regulation is to suspend a well to ensure its' ongoing integrity, and guidance is provided in the Oil and Gas Activity Operations Manual to have ALL wellhead valves chained and locked at suspended wells or valve handles removed. Please chain and lock all valves at the wellhead or remove them.

An Inspection was conducted and as a result Non-Compliance(s) were found and must be corrected. For specifics on the Non-Compliances, refer to the **Non-Compliance Notice**.

To respond to these Non-Compliances, access the CM-IS Permit Holder Application.

Consideration should be given to checking your other locations for similar Non-Compliances.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.

Permit: 100020889
Well ID: 10637
Well Name: CLG-GP CLARKE C- 087-I/094-J-10
Location: NTS: C- 087-I/094-J-10

Permit: 100112598
