

## Inspection Report

Permit Holder: Pacific Northern Gas Ltd.

Inspection: 2026-3347

Inspection Date: 2026-09-10

Inspection Outcome: Inspected

### Inspection Comment:

BCER conducted an inspection of Pacific Northern Gas Integrity Dig #6091 on September 10, 2026. The integrity dig was undertaken to investigate a pipeline anomaly identified through an in-line inspection program on the R5 to Methanex line at MP8.5. Two site holes had been hand dug to daylight the pipeline prior to mechanical excavation.

Water accumulating within the excavation will be pumped to a well-vegetated area adjacent to the worksite. Pump being set up at time of inspection. No major water accumulation observed in excavated area at time of inspection. Topsoil excavated from the work area was stockpiled separately adjacent to the excavation. No evidence of erosion or sediment transport was observed at the time of inspection.

Discussed safety protocols regarding open excavations with permit holder.

Spill response and fire suppression equipment were present onsite. The Emergency Response Plan was available onsite and applicable permits associated with the activity were reviewed during the inspection.

The worksite was located adjacent to a major highway. Traffic control measures, including a reduced speed zone through the work area, were in place at the time of inspection.

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.

Permit: 100002825

Pipeline Project ID: 000001422

Segment IDs (Location): 27 (From NTS: B- 038-H/103-I-02 To NTS: B- 043-I/103-I-07)

Permit Holder: Pacific Northern Gas Ltd.
