

Inspection Report

Permit Holder: Tourmaline Oil Corp.

Inspection: 2026-3457

Inspection Date: 2026-10-01

Inspection Outcome: Inspected

Inspection Comment:

One of the meter run calibrations and orifice plate inspections are coming due such as c-G-23-G well. The c-2-G well has A 5 year exemption tag on the meter run and that helps determine compliance. Isolation valves for ESDs are locked in the open position as expected. There are high pressure burst plates on the c-e-2-g and c-f-2-G surface casing vents. Only one well is not active (c-b-2-G) and it's status is cased. The zip tie on the test separator atmosphere sample point is still zip tied from the manufacturer and needs to be removed to be functional.

Chemical tanks are compliant in their set up.

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.

Permit: 100117183

Well ID: 49879
