

Inspection Report

Permit Holder: ConocoPhillips Canada Resources Corp.

Inspection: 2026-3478

Inspection Date: 2026-10-02

Inspection Outcome: Inspected

Inspection Comment:

This is a single well lease. All that remains is a newer wellhead. There was a significant surface casing vent leak years ago that apparently has been worked on with the installation of a newer wellhead. All other equipment has been removed. There are ground monitoring well on location in regards to an old restored flare pit. There is a pile of coarse woody debris for restoration purposes when the site is ready. No concerns noted.

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.

Permit: 100005905
