

Inspection Report

Permit Holder: Canadian Natural Resources Limited

Inspection: 2026-3509

Inspection Date: 2026-10-13

Inspection Outcome: Inspected

Inspection Comment:

All wells were active on the day of inspection. The tank farm, group/test separator, pipeline header were all compliant in their set up and operation.

The orifice plates were inspected in July 2026 but the meters were last calibrated in July 2025. Do these meters have a 5 year exemption? There is no tag stating such. If there is no exemption, the meters are due for calibration.

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.
