

Inspection Report

Permit Holder: Tourmaline Oil Corp.
Inspection: 2026-3521
Inspection Date: 2026-10-14
Inspection Outcome: Non-Compliance(s) Found

Inspection Comment:

The b-J-5-A meter runs calibrations and orifice plate inspection are due according to the available documentation.

While there is one small deficiency, this site had almost all of the main components related to measurement and ESD function in great shape. The 5 year exemption tags and documenting the annual orifice plate inspection made the task of assessing compliance much easier.

An Inspection was conducted and as a result Non-Compliance(s) were found and must be corrected. For specifics on the Non-Compliances, refer to the **Non-Compliance Notice**.

To respond to these Non-Compliances, access the CM-IS Permit Holder Application.

Consideration should be given to checking your other locations for similar Non-Compliances.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.
