

Inspection Report

Permit Holder: Tourmaline Oil Corp.
Inspection: 2026-3544
Inspection Date: 2026-10-15
Inspection Outcome: Non-Compliance(s) Found

Inspection Comment:

Observations;

The b-35-A ,b-a-35, b-b-35, b-c and b-d-35 wells all have their annulus valves buried in gravel and these should be excavated so they are functional.

Check your bonding and grounding on the chemical tank in proximity to the b-c-35 well as it appears to be bonded but not grounded like the other chemical tank units.

The measurement calibrations and orifice plate inspections are being very well looked after and compliance is easily determined.

Quite a few of the surface casing vents (SCV) have pressure gauges on them. I met the Tourmaline technician monitoring all of the SCV flows and he explained how they are monitored and the newer digital device to measure flow. Thanks for our discussion.

An Inspection was conducted and as a result Non-Compliance(s) were found and must be corrected. For specifics on the Non-Compliances, refer to the **Non-Compliance Notice**.

To respond to these Non-Compliances, access the CM-IS Permit Holder Application.

Consideration should be given to checking your other locations for similar Non-Compliances.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.
