Inspection Report

Permit Holder: Canadian Natural Resources Limited
Inspection: 2026-3566
Inspection Date: 2026-10-30
Inspection Outcome: Inspected

Inspection Comment:
WA# 5966 - Oct. 30, 2026, 12:45 pm on site. CNRL joint field inspection.

Wellhead: PSV installed on surface casing vent. SCVA ball valve was found in the closed position (2x): CNRL staff opened the valve at the time of the inspection.

IRIS Emission vent flow testing completed by CNRL - 2023: CNRL is required to complete and re-submit SCVF testing.

KERMIT last gas production date: 2026-09 (Active Production Status). Flowlines are connected to wellhead/building.

Signage posted is compliant to standards: Note: flammable symbol is faded and may require replacement in the near future.

Well Building: Meter calibration / verification date: 2025 and Orifice plate service date: 2026. Cata-dyne regulator vent line in place/installed.

Flowline: Pig barrel chain in place/installed.

Storage: double wall tank on metal stand, SDS Labels posted, and grounded.

A satisfactory Inspection was conducted.

The following were the only items that were inspected during this Inspection and does not absolve the company of Non-Compliances which may not have been observed, nor any Non-Compliances which occur subsequent to this Inspection.
